

Industrial Solutions Unlimited has over 15 years experience servicing food manufacturing. We examine applications, provide alternative solutions, and make recommendations to reduce current spend on replacement items. We also engineer custom parts emphasizing process improvement. Our quick effective solutions will save you time and money.

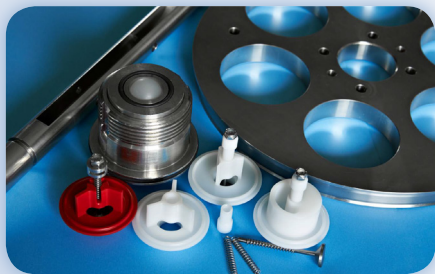

Hot Press

Engineering belts specific to your application, ISU provides the longest lasting press belts through testing and analysis. By servicing dies, springs, and pulleys, we are able to supply all of your application needs. ISU stocks various Teflon mill thicknesses to customize the correct belt for your conveyor. We have the capability to manufacture Lawrence (Legend) belts and will stock whatever is asked to provide next day delivery.

Custom Conveyor Belts

Our fabrication shop allows us to provide immediate service for all of your belting needs. Through examining the application, we assist by increasing throughput, reducing downtime, and extending overall belt life. We service wire, modular, and all types of flat belting.

Custom Machine and Packaging Parts

ISU manufacture's aftermarket parts for various OEM's. Our parts are guaranteed to meet or exceed your expectations at a reduced cost. We reverse engineer parts and offer process improvements based on the application. We provide everything from gaskets, bushings, blades, and shafts to seal bars, mounting brackets, cartridge heaters and springs. By improving release characteristics and increasing wear resistance, our parts enable you to run longer with less downtime.
